

WE'RE HIRING!

Oracle Techno-Functional Consultant (Manufacturing, SCM & Advance SCM)

Are you ready to take your Oracle EBS R12 expertise to the next level? Join our team and be at the forefront of innovation and transformation!

About the Role:

You will play a pivotal role in driving innovation and transformation. Your primary responsibility is to collaborate closely with business users, designing, developing, and implementing solutions that fundamentally redefine our business processes. This role goes beyond technology; it's about architecting progress and shaping the future of Oracle excellence. Your expertise will be the catalyst for transformative change, grounding innovation in practical solutions that make a tangible impact.

The Requirements:

The right individual should possess a BCS/BS degree and 7-10 years of experience as an Oracle EBS R12 Techno-Functional Consultant specializing in P2P, O2C, and Discrete Manufacturing domains. A proven track record in implementation and upgrade projects, coupled with in-depth knowledge of Oracle functions, setups, and API/Web service management, sets you apart. Proficiency in Oracle APEX for rapid application development and reporting is a must.

The position offers career growth with an attractive remuneration package including a company-maintained vehicle on buyback along with other fringe benefits.

Send your CV at careers@changan.com.pk

The position is Plant-based (Bin Qasim Karachi). To apply, mention position as subject line.
